

BUTTERFLY LULLABY

EMAILING YOUR DIGITAL IMAGE(S)

1. Choose your character from the Fairy Portraits.
2. Ask someone with a good quality digital camera to take your photo. Make sure the camera is set to its highest resolution possible.
3. Wear appropriate clothing for the photo shoot.
4. Pose in the same position as the character you have chosen to be.
5. Ask the person who is taking the picture to get as much of you in the picture as possible.
6. Save your image as a jpg.
7. Do not shrink this image or make copies of it as it will lose its resolution.
8. Go to our website and select your chosen Fairy Portrait.
9. Select Option B Email your Image.
10. On paying, you will be given an email address to send your image.

The quality of the picture will depend solely on your image. Please ensure your image is at least 300 pixels and that you use a good quality digital camera. Do keep in mind that the image you have taken will not be of the same quality as that of a professional photographer. You may only be able to print A4/A3 prints from your finished fairy portrait, depending on your photograph.

Note. You cannot beat a professional photo shoot for quality, especially if you would like to have your image transformed onto a large canvas.
